

VVTA RFP 2021-07 SECURITY CAMERA SYSTEM UPDATE ADDENDUM NO. 3

Friday, February 12, 2021

This addendum is provided to all known prospective proposers for clarification of the subject Request for Proposal (RFP).

Software: VVTA has determined that the software controlling the camera systems for all four locations should be the Avigilon system, as installed at the Barstow Facility, or equal.

Hesperia Location (See Exhibit 1):

Please see the attached site map and camera listing with regard to the current status of cameras. Some cameras need to be replaced. The listing shows the kind of camera to replace the existing camera. VVTA is removing two of the cameras that we no longer need and will not be the responsibility of the Proposer for demolition.

Victorville Transportation Center (aka D Street) (See Exhibit 2):

Please see the attached satellite view of the center. There are yellow markings indicating where the new cameras need to be located. These need to be Wide Angle IP cameras.

The cameras already located at the facility need to be replaced with Digital IP Cameras. VVTA is asking for Proposals to include the cost for the disposal of the old cameras.

Removed from this project: The cameras located at the City of Victorville CNG filling station.

Barstow Location (See Exhibit 3):

Please see the attached site map and camera listing. The new 4 cameras are marked on the attached plan.

Barstow CNG/LCNG Station (See Exhibit 4):

Please see the attached drawing showing the location of the 4 cameras that need to be installed. The camera on the top right-hand side (the black marking) needs to be a PTZ, IP. The three remaining cameras need to be wide angle. All four cameras need to be High Luxe to capture images in the dark. The cameras need to be connected to the software system using point to point wifi. Exhibit 4 also includes the pricing sheet for this location.

CORRECTION - Change High Lux to Low Lux - the lower the better image at 0 dark. (There are references on some of the maps and the camera listing that request high lux. We need to be able to see the images in the dark.)

Important dates to remember:

Last Day for Questions:	Friday, February 19, 2021 at 5:00 PM (PST)
Release of final Addendum:	Thursday, February 25, 2021 at 2:00 PM (PST)
Due Date for Proposals:	Thursday, March 4, 2021, at 3:00 PM (PST)

All other terms and conditions of the RFP remain the same.

As stated in the RFP, all addenda must be acknowledged. Please use Attachment G of the RFP to acknowledge receipt of this addendum. Failure to acknowledge any addenda to this RFP may be cause to deem Bidder "Non-Responsive."
